Accessibility

This section shows accessibility issues, indicating problems for older users, people with disabilities and those with accessibility needs.

⊗ **WCAG 2 Priority A - Issues found (disabled users will find it impossible to use some pages)**

5 issues on 1 pages

Priority URL / Description

● Each A element must contain text or an IMG with an ALT attribute.

Add text to the link, or ALT text if the link contains an image. If there is no link text or the ALT text is blank, screen readers have nothing to read, so read out the URL instead. The TITLE attribute on the A element doesn't work in:

- WindowEyes 8.4 with IE11 (the link HREF is read instead)
- VoiceOver on OSX 10.9 (the image filename is read instead)

<http://exhibition.sidora.si.edu/fedora/repository/si:2757192?&time=1470240711> line 281

Guideline: [WCAG 2.0 A F89](#)

● IMG elements must have an ALT attribute.

Add an ALT attribute describing each image, which screen readers read aloud. Spacer images and purely decorative images should use ALT="".

- NVDA 2015.2 FF40 Windows 7 Reading: Image ignored.
- JAWS 16.0.4350 FF40 Windows 7 Reading: Image ignored.
- WindowEyes 8.4 IE11 Windows 7 Reading: Image ignored.
- VoiceOver Safari OSX 10.10 Reading: Image filename read out.
- VoiceOver Safari iOS 7.1 Touch: Image filename read out.
- SaToGo 3.4.96.0 IE11 Windows 7 Reading: Image ignored.

Guideline: [WCAG 2.0 A F65](#)

● This element uses JavaScript to behave like a link. Links like this cannot be tabbed to from the keyboard and are not read out when screen readers list the links on a page.

Use an A or AREA element with the link target in the HREF or a target like

HREF='#'. An A or AREA element without an HREF cannot receive keyboard focus.

<http://exhibition.sidora.si.edu/fedora/repository/si:2757192?&time=1470240711> line 393

Guideline: [WCAG 2.0 A F42](#)

Ensure that foreground and background colors have enough contrast.

Some users find it hard to read light gray text on a white background, dark gray text on a black background and white text on a red background.

- The contrast ratio should be 3.0 or more for 18 point text, or larger
- The contrast ratio should be 3.0 or more for 14 point bold text, or larger
- The contrast ratio should be 4.5 or more for all other text

The foreground/background contrast ratio is 2.8 with 25.2 point text.

<http://exhibition.sidora.si.edu/fedora/repository/si:2757192?&time=1470240711> line 229 251
255 281 ...

Guideline: [WCAG 2.0 AA 1.4.3](#)

If you set any of the colors on the BODY or A elements you must set all of them.

In HTML the color attributes are TEXT, BGCOLOR, LINK, ALINK and VLINK. In CSS the attributes are COLOR and BACKGROUND-COLOR. Some users have browser defaults set to white text on a black background, so setting one color without setting the others can result in black text on a black background.
